

Invoice Header Fields

These fields establish the core parties and order context in German B2B purchase orders.[sample_pdf_1.pdf](#)

- **Kundenanschrift** (Customer Address): Full delivery/billing address of the purchasing company (e.g., "Industriestraße 3, 12345 Köln"). Identifies where goods should be shipped.[sample_pdf_1.pdf](#)
- **Unsere Kundennummer** (Our Customer Number): Internal vendor reference for the buyer (e.g., "0102860405"). Used for account tracking.[sample_pdf_1.pdf](#)
- **Endkundennummer** (End Customer Number): Ultimate parent/chain customer ID (e.g., "11223344"). Shows corporate hierarchy.[sample_pdf_1.pdf](#)
- **Unser(e) Einkäufer(in)** (Our Buyer): Name/contact of purchasing department (e.g., "Zentraleinkauf"). Procurement contact person.[sample_pdf_1.pdf](#)
- **Telefon für Rückfragen** (Phone for Inquiries): Direct contact number (e.g., "060/1212121"). For order clarifications.[sample_pdf_1.pdf](#)
- **Fax für Rückfragen** (Fax for Inquiries): Legacy fax contact (e.g., "0800-12646711"). Common in German business docs.[sample_pdf_1.pdf](#)
- **Gewünschtes Lieferdatum** (Desired Delivery Date): Target delivery time (e.g., "sofort" = immediately).[sample_pdf_1.pdf](#)

Order Details Fields

Logistical and financial terms per German VAT law (§14 UStG).[vat-germany](#)

- **Lieferbedingungen** (Delivery Conditions): Shipping terms (e.g., "Keine Angabe" = no specification).[sample_pdf_1.pdf](#)
- **Bitte liefern Sie an** (Please deliver to): Physical delivery destination (e.g., "ABC Corporation"). Often differs from billing address.[sample_pdf_1.pdf](#)
- **Zahlungsbedingungen** (Payment Terms): Net payment + discount (e.g., "0 Tage 2,0% Skonto" = net immediate, 2% discount if paid within 0 days).[sample_pdf_1.pdf](#)

Item Table Fields (Pos. Section)

Line-item breakdown required for VAT compliance.[firma](#)

Field	German Term	Meaning & Example Value sample_pdf_1.pdf
Pos.	Pos.	Item position/sequence number (e.g., "1")

Artikelbeschreibung	Article Description	Product details + codes (e.g., "Sterilisationsmittel" = Sterilization Agent; includes Lief.Art.Nr=Supplier Article No., Interne Mat.Nr=Internal Material No., Kostenstelle=Cost Center)
Preis in EUR	Price in EUR	Unit price per VE (e.g., "64,00 pro 1 VE") stripe
Menge	Quantity	Ordered amount (e.g., "4 VE")
Einheit	Unit	Packaging unit (e.g., "VE" = Verpackungseinheit/sales unit)
Umrechnung	Conversion	Unit breakdown (e.g., "1 VE=20 Stück" = 1 sales unit = 20 pieces)
Bestellwert in EUR	Order Value in EUR	Line total (e.g., "64,00")

Totals Section

Mandatory VAT breakdown per §14 UStG. [vat-germany](#)

- **Gesamtwert** (Total Value): Pre-VAT subtotal (e.g., "64,00 EUR"). Net amount.sample_pdf_1.pdf
- **MwSt. 19,00%** (VAT 19.00%): Standard German VAT calculated at 19% (e.g., "12,16 EUR").[stripe](#)
- **Gesamtwert inkl. MwSt.** (Total incl. VAT): Final payable amount (e.g., "76,16 EUR"). Gross total.sample_pdf_1.pdf
- **Seite 1 von 1** (Page 1 of 1): Document pagination.sample_pdf_1.pdf

Business Context

These are **purchase order invoices** (Bestellung) from German central purchasing departments acting "im Auftrag von" (on behalf of) parent companies. All fields ensure VAT compliance, supply chain tracking, and legal auditability.

You: help me out , so this invoice was generated by who ? and who is supplying the product ? and who is paying for it and who is receiving the product . what do you mean by parent company here and what do you mean by vendor ? and what is end customer number who is it

related to and what is our customer number who is it related to ? explain everything and make me understand what transaction is happening here and how is it happening .

The Complete Transaction Flow (Step-by-Step)

This is a **3-party B2B purchase order invoice** common in German corporations with centralized procurement. Here's exactly who's doing what:[sample_pdf_1.pdf](#)[tradogram](#)

1. Who Generated the Invoice? (Supplier/Vendor)

text

Beispielname Unternehmen (medical equipment supplier)
Albertus-Magnus-Str. 8, Matternfeld, SL 44624, Deutschland

- **Role:** They created/sent this document
- **What they do:** Supply the sterilization agent (Sterilisationsmittel)
- **They get paid:** €76.16 totalsample_pdf_1.pdf

2. Who is Paying? (The Corporate Buyer)

text

Corporate Buyer: Zentraleinkauf (Central Purchasing Department)
On behalf of Parent Company: 3498578433 (End Customer Number)
Billing Address: Industriestraße 3, 12345 Köln

- **Pays the money** to Beispielname Unternehmen
- **Manages the order** through their procurement systemsample_pdf_1.pdf

3. Who Receives the Physical Product? (Delivery Destination)

text

ABC Corporation, medical equipment (Deutschland)

- **Gets the 80 pieces of sterilization agent** delivered to them

- "Bitte liefern Sie an" = "Please deliver to"sample_pdf_1.pdf

Key Numbers Explained (Corporate Hierarchy)

Number	Field	Who it belongs to	Purpose
0102860405	Unsere Kundennummer (Our Customer Number)	Zentraleinkauf (the corporate buyer)	Vendor's internal account number for this specific buyer. When Zentraleinkauf calls, supplier looks up "0102860405" in their system. sample_pdf_1.pdf
11223344	Endkundennummer (End Customer Number)	Parent Company (3498578433)	Ultimate corporate owner. Shows "this order is approved by the big parent company". sample_pdf_1.pdf
3498578433	Order "im Auftrag von" (on behalf of)	Parent Company	The company that owns everything and authorized the spend. Central Purchasing is just their buying department. sample_pdf_1.pdf

Parent Company = The Big Boss

text

Parent Company (3498578433) owns:

- └─ Central Purchasing (Zentraleinkauf) - does all buying
- └─ ABC Corporation - uses the products

- **Central Purchasing** buys for the whole corporation
- **"im Auftrag von 3498578433"** = "authorized by parent company 3498578433"
- Parent company sees all spending across subsidiaries**bundesnetzagentur**sample_pdf_1.pdf

Vendor = The Seller

text

Beispielname Unternehmen = The medical equipment supplier

- Simple: They're selling sterilization agent
- They track customers by "Our Customer Number" (0102860405)

The Transaction Flow (What Happens)

text

Step 1: Parent Company (3498578433) approves budget

↓

Step 2: Central Purchasing (0102860405) places order AUFNR34343

↓

Step 3: Supplier (Beispielname Unternehmen) receives order

↓

Step 4: Supplier ships 80 pieces sterilization agent → ABC Corporation

↓

Step 5: Central Purchasing receives invoice, approves payment €76.16 → Supplier

↓

Step 6: Parent company (3498578433) audits everything matches

Visual Chain of Money & Goods

text

PRODUCT FLOW: Supplier → ABC Corporation (delivery)

↓

MONEY FLOW: Parent Co → Central Purchasing → Supplier (€76.16)

↓

AUTHORITY: Parent Co (3498578433) approves → Central Purchasing executes

Why This Complex Structure?

German VAT Law + Corporate Controls [stripe+1](#)

1. **Tax compliance:** Must track who pays VAT (Central Purchasing)
2. **Cost allocation:** Cost Center 20457 gets charged internally
3. **Audit trail:** Parent company tracks all subsidiary spending
4. **Centralized buying:** One department negotiates for entire corporation

Bottom Line: Medical supplier ships chemicals to hospital (ABC Corp). Big corporation's buying department pays the bill. Everyone tracked by unique numbers.sample_pdf_1.pdf

You : so this invoice is generated by the vendor ?

No - this is NOT an invoice generated by the vendor.sample_pdf_1.pdf[tradogram](#)

What This Document Actually Is:

This is a **Purchase Order (Bestellung)** from the **buyer** telling the vendor "Please supply us these items."

text

Document Type: [translate:Bestellung AUFNR34343] = "Order AUFNR34343"

Correct Flow:

text

1. BUYER (Zentraleinkauf) → Creates & sends this PURCHASE ORDER →
VENDOR

↓

2. VENDOR → Receives order → Ships goods → Creates & sends INVOICE →
BUYER

Document

Created By

Sent To

Purpose

This PDF	BUYER (Zentraleinkauf)	Vendor (Beispielname Unternehmen)	"Please send us 4 VE sterilization agent" sample_pdf_1.pdf
Real Invoice (not this PDF)	VENDOR	Buyer	"You owe us €76.16 for the delivered goods" stripe

Key Proof It's a Purchase Order (Not Invoice):

- **"Bestellung"** = Order (not Rechnung = Invoice)
- Contains **desired delivery date** ("sofort")
- Lists **what BUYER wants** (not what VENDOR already delivered)
- **Buyer contact info** at top (for vendor questions)

Summary: Vendor (Beispielname Unternehmen) receives this PDF as a shopping list from corporate buyer. Vendor then fulfills order and sends back their own invoice for payment. [docshield.tungstenautomation](#)sample_pdf_1.pdf

You : Give me a basic schema Example which I can implement using Pydantic.

Pydantic Models (models.py)

```
from pydantic import BaseModel, validator

from typing import List

from datetime import date
```

```
import re

class LineItem(BaseModel):

    pos: int

    product_name: str

    supplier_article_no: str

    cost_center: str

    # ... all fields

class PurchaseOrder(BaseModel):

    order_number: str

    creator_customer_number: str

    # ... all fields

    line_items: List[LineItem]

    @validator('order_number')

    def validate_order_number(cls, v):

        if not re.match(r'AUFNR\d{5}', v):

            raise ValueError('Invalid AUFNR format')

        return v
```
